Kemi-Tornio operations environment, occupational health & safety and quality policy (EHSQ)

As a manufacturer of ferrochrome and stainless steel in Kemi and Tornio, we act responsibly and take into account the economic, social and ecological impacts of our operations (ESG). We deliver value to the customer with our products and services. They meet our customers' expectations and requirements.

We comply with the requirements of the legislation and meet our own objectives.

Safety is our top priority in all our operations. We prevent accidents at work, process safety deviations, work-related illnesses and promote the well-being of our employees at work.

We reduce the environmental impact of our operations, improve our energy and material efficiency and promote the circular economy. We reduce direct and indirect CO2 emissions from our operations. We take into account biodiversity in the area where we affect.

We continuously assess the effectiveness of our operations, measures and the risks of our operations. Continuous improvement is our way of working.

We actively and openly inform our own personnel and stakeholders about matters related sustainability and report regularly to the authorities.

We commit to comply principles of Responsible Steel standard. In our mining operations, we commit to complying with the principles of Sustainable Mining (Towards Sustainable Mining, TSM).

We oblige contractors, subcontractors and other partners operating in our area to follow the same principles as we follow ourselves.

Martti Sassi

President – BA Ferrochrome

Jari Tikkanen

SVP – Operations Tornio
