DIRECTIVE 2011/65/EU (RoHS)

The European directive 2011/65/EU, serves to restrict the use of hazardous substances in electrical and electronic equipment with a view to contributing to the protection of human health and the environment. It also aims at improving the prospects of cost-effective and sustainable recycling of material waste from electronic and electronic equipment.

Directive 2011/65/EU (Restriction of Hazardous Substances), including the amendment to Annex II introduced by Delegated Directive (EU) 2015/863 (“RoHS III”), restricts the use of certain hazardous substances in electrical and electronic equipment. It establishes the following permissible maximum concentrations for hazardous substances in homogeneous materials:

- Lead (0,1 %)
- Mercury (0,1 %)
- Cadmium (0,01 %)
- Hexavalent chromium (0,1 %)
- Polybrominated biphenyls (PBB) (0,1 %)
- Polybrominated diphenyl ethers (PBDE) (0,1 %)
- Bis(2-ethylhexyl) phthalate (DEHP) (0,1 %)
- Butyl benzyl phthalate (BBP) (0,1 %)
- Dibutyl phthalate (DBP) (0,1 %)
- Diisobutyl phthalate (DIBP) (0,1 %)

These critical substances are not added during the production of our products and are consequently not present in uncoated stainless steel at all or only as technically unavoidable trace impurities in concentrations well below the specified limits.

In summary, the products of Outokumpu fully comply with RoHS and there are no substances to be declared.

For Outokumpu Group
